

YOSEF RETA AYCHILUHIM

Junior IT Officer · Addis Ababa, Ethiopia · yosefreta23@gmail.com · +251 92 736 2144

PROFESSIONAL SUMMARY

Curious, technically fluent early-career professional with 3+ years of experience solving real-world problems through IT systems, infrastructure, and product-minded design across banking and healthcare environments. Strong foundation in system administration, user needs analysis, and digital product improvement. Builds full websites, desktop applications and offline enterprise tools end-to-end, designing the interfaces personally.

EXPERIENCE

Junior IT Officer — Commercial Bank of Ethiopia — Yeka District IS Support *Apr 2023 — Present*

- Provide technical assistance, hardware/software troubleshooting, LAN/WAN configuration and ATM connectivity support across multiple branches.
- Designed and tested support workflows, improving system reliability and reducing user support tickets.
- Act as liaison between technical teams and non-technical users, gathering feedback and escalating usability issues.
- Support backend system changes, ensuring banking product updates are deployed successfully.

Junior System Administrator — Ethiopian Federal Police Hospital *Nov 2022 — Apr 2023*

- Contributed to network installations, website deployment and IT system optimization for a public hospital, enhancing data accessibility.
- Participated in the early-stage EHR rollout, aligning functional requirements with technical delivery.

IT Volunteer — Ethiopian Federal Police Hospital *Aug 2021 — Nov 2022*

- Designed and deployed a local web-based patient tracking system, reducing manual entry time by roughly 40%.
- Built lightweight digital interfaces and forms using HTML, PHP and MySQL to simplify medical workflows.

SELECTED PROJECTS

LAN Terminal & File Explorer — portable offline Windows desktop app for browsing and monitoring 200+ networked terminals with no database or internet dependency. Python, CustomTkinter, PyInstaller.

Offline Network Monitoring Dashboard — enterprise-grade, PRTG-inspired live monitoring for LAN devices using a custom ICMP/TCP reachability engine. Python.

Single-File Enterprise Consoles — offline personnel/call-tracking and ATM network operations consoles running as a single HTML file with no backend. JavaScript, IndexedDB, SheetJS, Chart.js.

SKILLS

Development: HTML, CSS, JavaScript, PHP, MySQL, Python

Design: Graphic Design, Photoshop, UI/UX Design, Figma

Networking: TCP/IP, DNS, VPNs, LAN/WAN troubleshooting, packet analyzers

Banking & Enterprise Systems: Core Banking (T24), IBM ticketing, remote desktop support

Process: Agile/sprint planning, documentation, stakeholder communication, AI-assisted workflow

EDUCATION

BSc, Computer Science — Addis Ababa University, 2022

Master's, Leadership & Management — FDRE Technical and Vocational Institute, 2025

LANGUAGES

Amharic (native), English (professional working proficiency)
